Why you meet with University of Alabama Delegates During Edu Fair Event?

Why U of Alabama University?

The University of Alabama is the no. 1 fastest growing flagship university in the United States. We invest in world-class infrastructure as we grow, opening the door to extraordinary opportunity in engineering, business, and sciences. UA has been among the Top 50 public universities in the US, for more than a decade (US News & World Report), and has engineering and science programs in the Top 200 according to the 2016 ShanghaiRankings. Our city, Tuscaloosa, was voted "Most Livable City in America" in its size category, by the US Conference of Mayors, and combines the best of small-town and big-city living, with mild winters. We are located in the southeastern US, 3 hours by car from Atlanta or Nashville. The beautiful campus, dating back to 1831, has a canopy of over 10,000 trees. We offer conditional admission for students with low or no English test score, and our Capstone International Center helps our international students create a home away from home. Minimum GRE 300, GMAT 500, TOEFL 79, IELTS 6.5, PTE 59.

Benefit to Study in U of Alabama

The University of Alabama has research strengths in four key interdisciplinary areas: 1) Water/Energy/Environment, 2) Transportation & Vehicle Technology, 3) Cybersecurity and Information Technology, 4) Life Sciences. These areas, so important to the future of both India and the US, involve engineering, big data analysis, statistics, computer science, economics, business, math and science.
